

DOMETIC MW 13 BUILT-IN MICROWAVE WITH GRILL

THE FIRST BUILT-IN MICROWAVE FOR MOTORHOMES AND CARAVANS

A kitchen without a microwave? Simply unthinkable! The Dometic microwave was specially designed as an easy to install built-in solution for recreational vehicles. This increases safety, saves space and prevents power dissipation. In order to guarantee the optimal heating of food, the device uses a three-dimensional Dual Emission System. The Jet-Defrost function is also super efficient: up to 85% faster than other defrost functions!

MY ADVANTAGES

- Specially developed for installation in caravans and motorhomes. No power dissipation, extremely safe with a space-saving design
- 3D Dual Emission System: Heats food uniformly without thermal bridging
- Cooling-down function: Automatic cool-down and subsequent power-off after each use

**JET
DEFROST**

1. Pause/Stop function: Pause or stop the heating process.
2. Grill function: for gratins or browning of foods.
3. Timer function with clock and acoustic signal: for the precisely timed preparation of food.
4. Jet Defrost function: especially fast and precise defrosting of food. Up to 85% faster than conventional defrost functions!
5. Fast start function: for quickly heating soups and beverages.
